CAREER OBJECTIVE

Computer Science and Engineering undergraduate specializing in AI & ML, with a foundation in Python, Java, SQL, machine learning and web development. Hands-on experience building AI-powered applications.

EDUCATION

B.Tech in Computer Science and Engineering - AI & ML | Kalasalingam Academy of Research and Education
Period: 2024 - 2028 | CGPA: 8.41

Intermediate: SDRs Akanksha Junior College, MPC, Nandyal, AP | 2024 | 88.5%
10th Class: Narayana Group of Schools, Kurnool, AP | 2022 | 74.13%

FEATURED PROJECTS

1. UniPulse - AI-Powered Academic & Career Guidance Platform (2026)
   Centralized platform concept for academic resources, career roadmaps and certification discovery.
2. Solar & Wind Deployment Intelligence Platform (Infosys Springboard Project)
   Renewable-energy site assessment backend using solar, wind, terrain and infrastructure data.
3. SolarIQ - AI Solar Panel Performance & Efficiency Optimizer
   Full-stack solar analysis application combining physics-based calculations with XGBoost predictions.

TECHNICAL SKILLS

Programming: Python, Java (Basics), C (Basics) | Web: React, Next.js, HTML, CSS, JavaScript
AI & ML: Supervised/Unsupervised Learning, Regression, Classification, Model Evaluation, NLP (TF-IDF), XGBoost
Databases & Backend: SQL, Firebase, MongoDB, FastAPI, PostgreSQL | Tools: VS Code, GitHub, Google Colab

EXPERIENCE & ACHIEVEMENTS

ByteHearts: Full Stack Development Intern | Infosys Springboard: AI & ML Virtual Intern
IKSC: Web Developer | Coding Blocks: Content Creator

KRONE'26: Winner - National-Level Hackathon
Publication: Automated System-based Attendance System - Journal: JETNR
Certifications: Quantum Computing (IUCEE), Python (CodeTantra), DBMS & DAA (CodeChef)
