CAREER OBJECTIVE

Computer Science and Engineering undergraduate specializing in Artificial Intelligence and Machine Learning, with a foundation in Python, Java, SQL, machine learning and web development. Hands-on experience building AI-powered applications and contributing to software projects. Interested in software development and AI/ML opportunities where I can apply programming, analytical thinking and collaboration skills.

EDUCATION

B.Tech, Computer Science and Engineering (AI & ML) | Kalasalingam Academy of Research and Education, Tamil Nadu | *2024–2028* - CGPA: 8.41
Intermediate (MPC) | SDRs Akanksha Junior College, Nandyal, Andhra Pradesh | *2024* - Percentage: 88.5%
10th Class | Narayana Group of Schools, Kurnool, Andhra Pradesh | *2022* - Percentage: 74.13%

TECHNICAL SKILLS

Programming: Python, Java(Basics), C(Basics)
Web Development: HTML, CSS, JavaScript (basics), React
AI & Machine Learning: Supervised and unsupervised learning, regression, classification, model evaluation, NLP (TF-IDF), XGBoost
Databases & Backend: SQL, Firebase, MongoDB, FastAPI, PostgreSQL
Tools: VS Code, GitHub, Google Colab
Soft Skills: Problem solving, teamwork, team coordination, creative and critical thinking

PROJECTS

UniPulse – AI-Powered Academic and Career Guidance Platform | *2026*
- Designed a centralized platform concept for academic resources, career roadmaps and certification discovery.
- Planned AI-assisted guidance and a chatbot with file/photo upload; proposed stack: Next.js, FastAPI and Firebase.

Solar & Wind Deployment Intelligence Platform | *Infosys Springboard project*
- Worked on a platform backend for renewable-energy site assessment using solar, wind, terrain and infrastructure data.
- Backend technologies include FastAPI, PostgreSQL and SQLAlchemy; dashboard visualizations use Chart.js.

SolarIQ – AI Solar Panel Performance and Efficiency Optimizer |
- Developed a full-stack solar analysis application combining physics-based performance calculations with AI predictions.
- Implemented performance analysis and what-if optimization workflows; technology stack includes React, FastAPI, XGBoost and MongoDB.

INTERNSHIPS & EXPERIENCE

Full Stack Development Intern | ByteHearts
- Selected for a four-month internship following a hackathon selection process.
- Worked on web development tasks and collaborated with a team.

AI & ML Virtual Intern | Infosys Springboard
- Completed AI/ML internship learning modules and practical activities.

Web Developer | IKSC

Content Creator | Coding Blocks

ACHIEVEMENTS & PUBLICATION

- Winner – KRONE'26 National-Level Hackathon.
- Publication: “Automated System-based Attendance System” – JETNR.

CERTIFICATIONS

Quantum Computing – IUCEE
Python – CodeTantra
Database Management System – Design and Analysis of Algorithm – CodeChef
